

## **IICA conducts Leadership Development Programme for UCO Bank Executives**

The School of Finance, IICA, conducted a Leadership Development Programme (LDP) for 32 executives of UCO Bank from August 18 to 23, 2014. The comprehensive and holistic approach of the programme helped the participants to broaden their understanding of core banking functions and built their confidence to undertake greater cross-functional responsibility. Key management functions related to the major challenges in organisational management were addressed, giving the participants greater confidence with the enhanced grasp and understanding they gathered in the course of the programme. The participants returned with a personal action plan for identifying and addressing the key challenges of their roles within the organisation, empowered by actionable lessons that may be effectively applied for the achievement of their personal and professional goals.
